

Exhibitor Guidelines

Exhibition Fees (1 space : 3m × 3m = 9 square meters) *tax included

Standard	Regular Fee (less than 8 spaces)	Exhibition Fee: 418,000 JPY
	Special Fee (8 spaces or more)	Exhibition Fee: 396,000 JPY
University Labs		Exhibition Fee: 209,000 JPY
Exhibitor Presentation (30 mins)		Presentation Fee: 165,000 JPY

The exhibitor presentation fee includes the data (personal information) of 10 audience members.
If you would like to receive audience data more than 11 persons, we will provide it for 3,300 yen per person (tax included).
For more information, please contact the Secretariat.

[The exhibition fee covers the following]

- Side panels are provided when the space borders on neighboring booths.
- Corner booth spaces include only one side wall.
- Online Product information registration (materials, images, videos)-Max.10
*Co-exhibitor: Max. 3
- Obtaining viewer data for the materials and videos listed above
- E-Invitation

[The exhibition fee does not cover the following]

Costs for booths' installation, dismantling, decoration, cleaning, waste disposal, charges for electricity/water supply, drainage, nor internet fees.

EX. If you apply for 1 space exhibit (Standard) and a package booth plan,

Exhibition fee: 418,000 JPY + Package Booth Plan: 176,000 JPY = 594,000 JPY *tax included

Booth allocation is made by the organizer with consideration for order of application, number of booths, and exhibit record.

Schedule (tentative)

How to apply Apply online from the exhibition website. [Click here.](#)

1 Application Deadline July 31st, 2026

Contract will be made official at the time the Secretariat receives the application form.

*However, if all spaces are reserved prior to the deadline, the application will no longer be accepted, so please apply early.

2 Payment An invoice will be issued by the exhibitor online system after receiving the official application.

*Bills will be issued sequentially from June onward.

3 Cancellation Cancellation may not be accepted after June 1st, 2026.

*However, if the Secretariat determines cancellation is unavoidable, cancellation shall be accepted upon payment of the cancellation fees listed in the chart to the right.

Based on the date cancellation notification was received in writing.	Cancellation Fee Rate
Until May 31, 2026	0% of the invoiced amount (including taxes).
From June 1 to July 31, 2026	50% of the invoiced amount (including taxes).
From Aug. 1, 2026	100% of the invoiced amount (including taxes).

New Materials, Added Value and Converting Technology

The exhibition where you can find R&D, Product Development and Manufacture Technology Professionals

CONVERTECH

Comprehensive Exhibition of Processing Machinery and Technology

Comprehensive Exhibition of Functional Materials

neo functional material

GREEN MATERIAL

Exhibition on Environmentally Conscious Manufacturing

Specialized Exhibition of Decorative Technology

3DECOtech

WELL-BEING TECHNOLOGY

Exhibition of Technologies for a Comfortable and Prosperous Society

December 2026
Exhibition Guide

2026

12.16(Wed.) - 18(Fri.)

West and South Hall, Tokyo Big Sight

Due to major renovations and a general closure of the Tokyo Big Sight East Hall, the 2026 show will be held in the West and South Halls.

CONVERTECH

【コンバーテック】

Coating
Laminating
Slitting
Printing Technology, etc.

Printing / Converting /
Contracted Services
Perovskite Solar Cell / Battery
Flexible Packaging

Coaters, vacuum coating equipment, laminators, gravure, flexo, inkjet printing machines, slitters, rewinders, film forming devices and related equipment, inspection equipment, control systems, rollers, web handling devices, static and web sheet cleaning devices, blades, testing / measuring / analysis equipment, pulverizers / mixers, contracted manufacturing service, other peripheral equipment

Energy devices zone

Converting machinery and equipment / technology

Converting machinery and equipment, coating / printing / slitting / laminating machinery and equipment, perovskite solar cell / battery materials making machine, printing / related equipment, semiconductor processing equipment, Printed Electronics, FHE (flexible hybrid electronics), 3D-MID, imprint, sputtering, micro-pattern exposure equipment, etc.

Energy devices

Next-generation solar cells (perovskite solar cells, organic thin-film solar cells, etc.), rechargeable batteries (all-solid battery, semi-solid battery, etc.), capacitors, sensors, organic TFT, wireless devices, etc.

Smart

manufacturing zone

Control systems (web handling systems, web guides), web defect inspection / measuring systems / AI image processing, printing inspection systems, sensors, communication modules and devices, FA equipment, ERP (Enterprise Resource Planning systems), production control systems, automation / manpower saving / rationalization / AI supported solutions, on-site manufacturing systems and solutions, etc.

Functional Film / Sheets
Functional Materials
-Resin
-Coating Agents
-Additives

Electronics
Automobile
Battery
Architecture & Living Environment
Package

Materials zone

Functional materials, functional resins / additives, coatings / paints / inks, adhesives, functional films, composite materials, functionalizing materials (thermal, conductive, dielectric, electromagnetic countermeasures), etc.

Energy materials zone

Materials for next generation solar cells and rechargeable batteries such as perovskite solar cells, organic thin film solar cells, all-solid batteries, semi-solid batteries, etc., conductive materials, transparent materials, Insulating materials, thermal management materials, organic semiconductor materials, films for batteries, reagents for battery, etc.

Digital R&D zone

Generative AI solutions, materials informatics (materials search, property prediction, first-principles calculation, etc.), process informatics (process search, realtime sensing, process simulation, etc.), common technology (autonomy search system, high-throughput experimentation), AI robot, analysis / evaluation / measurement, etc.)

Nonwoven /
Functional paper zone

Nonwoven fabric, functional fibers / fiber sheets / compound materials, filters, functional paper, paper / special paper, pulp / raw fiber / wood materials (cellulose / CNF / biomass plastic), paper making materials, paper making chemicals, etc.

Prototyping /
Contracting zone

Contracted manufacturing, research, analysis, measuring, prototyping, pilot production, OEM, R&D support (test sample production, etc.), consulting, etc.

GREEN MATERIAL

【グリーンマテリアル】

Bioplastics
Wood-sourced Materials
Recycled Materials
Resource Recycling
Platform

Automobile
Package
Architecture & Living
Daily Necessities & Food
Clothing

Materials

Bioplastics (bio-based plastics / biodegradable plastics), wood-sourced materials (paper / cellulose / tar / lignin), mineral-sourced materials (limestone / calcium carbonate / mica / glass / mineral wool / glass fiber / carbon fiber / cement, etc.), untapped resources, ethical resources, PFAS-free materials, PFAS alternative materials, etc.

Resource recycling
process

Film cleaning device, solvent recovery system / solvent recycling system, crusher / pulverizer, cutting machine / shredder, sorting machine / compactor, plastic pelletizing machine, granulator / molding machine, melting machine, other recycling equipment, etc.

IT, Others

Resource circulation platform / digital service / consulting, etc.

3DECO tech

【スリーデコテック】

Decoration Technology
Decoration /
Release Devices
Decorative Films
Resin, etc.

Automobile
Home Appliance
Design
Printing / Converting /
Contracted Services, etc.

Decorative films and
transfer foils

In-mold lamination film, in-mold transfer film, overlay transfer film, overlay lamination film, water transfer film, deposition film, transfer foil, hologram film, etc.

Decorating and
transfer equipment

3D decorative molding technology, insert molding, in-mold lamination, in-mold decoration, surface decoration technology, trimming equipment, diemolds, etc.

Processing technology

Decoration, molding, graining, hair lining, sandblasting, heat & cool molding, decorative plating, coating, gloss application, finishing technologies, design, etc.

WELL-BEING TECHNOLOGY

【ウェルビーイングテクノロジー】

Sensing / Measurement
Work / Communication
Marketing
Material / Space
Academic Research

Business Development
Product and Service
Development
Marketing
Management and General
Affairs, etc.

Sensing /
Measurement

Visualization of body and mind (physical information, emotions, and kansei), brain-related technologies, wearables, measurement and analysis equipment, etc.

Work /
Communication

Five senses communication (tactile, olfaction, voice, image, language), AI and big data utilization, communication activation, health and productivity management, organizational vitality / productivity improvement, behavior change and habituation, diversity and inclusion, independence support, community building, products and services that contribute to safety and security, human augmentation, XR, robotics, etc.

Marketing

Kansei marketing, kansei and comfort evaluation, product and service development support, UX design, etc.

Material / Space

Space design (offices, facilities, stores), interiors, interior design, products and services for comfort, etc.

Academic Research

Ergonomics, affective engineering, information engineering, cognitive science, brain science, psychology, sociology, etc.

Promotion menu example

1

Interviews & Article Production

Professional writers will conduct interviews and produce articles for publication on the exhibition website, organizer newsletters, and other platforms. These materials can also be used as handouts on the day of the event.

Plan A (1P) : **165,000 JPY** (tax included)

Plan B (2P) : **330,000 JPY** (tax included)

2

Expand awareness by using the top page of the exhibition website

Your exhibitor's logo is displayed on the Website of the exhibition. Your logo will link to your exhibitor page directly. Long-term exposure will undoubtedly attract visitors to your booth and exhibitor page.

1 slot : **220,000 JPY** (tax included)

3

Mail distribution to a large DB (approx. 60,000) held by the organizer

Header ad (5 lines of text) in the organizer's newsletter with information on exhibits and products.

Text Ad in Official E-mail Newsletter Header Ad 1 slot : **165,000 JPY** (tax included)

OPTION URL clicker's company and department name report : **55,000 JPY** (tax included)

We have a new set plan available!

This is a set plan combining various promotions for greater effectiveness. Please select the plan best suited to your needs.

Awareness Expansion Plan ▶ **Maximum exposure at the exhibition venue ... 550,000 JPY** (tax included)

Lead Acquisition Plan ▶ **Promoting business card information 505,000 JPY** (tax included)

First-time Exhibitor Plan ▶ **Support for attracting customers 187,500 JPY** (tax included) [*Limited to first-time exhibitors with one booth (9m²) or more]

*Prices are based on previous results. Please contact the secretariat for details.
